

**TEST DATA SHEET** 

## **Description**

Mi-Wave's 530 Series waveguide switches consists of a waveguide switch selection and a rotary motor encased in a machined housing. They are particularly useful in operational systems and test setups where they supply variety of switching combinations.

S/N: NA

**Notes** 

## **Electrical Specifications**

	Minimal	Typical	Maximum
Frequency	50 GHz		75 GHz
Insertion Loss		0.4 dB	
VSWR		1.15:1	
Isolation		60	
Power Handling		100 Watts CW	

## **Physical Specifications**

,	
RF Ports	WR-15 Waveguide
Flange Type	UG-385/U Flange
Material	Brass
Finish	Gold Plated

Tested by: KM
